

Student Athletic Insurance

To the **Parent/Guardian** of a student athlete:

For the student who has private insurance as well as student athletic insurance;

All student athletic insurance companies require us to bill any other insurance that you may carry on your child before we file with them. If your child has student athletic insurance through the school you will not be billed your usual private insurance co-pay today. However, if we do not receive your student's insurance form filled out with signatures of the school official and parent we will not be able to file with them and the co-pay will be billed to you. You need to be active in helping your child's school provide this form to you. If this visit were to lead to a need for an MRI or surgery the cost could be even more significant.

For the student who has only student athletic insurance;

If your child has no private insurance and will be only student athletic insurance you will need to get the student insurance form filled out with signatures of the school official and parent. Please make sure this form is given to us or you will eventually receive a bill for services. You need to be active in helping your child's school provide this form to you. If this visit were to lead to a need for an MRI or surgery these companies will also need a copy of the insurance sheet. Most of them will not perform services without insurance documents.
